

Chapter Four (pp. 238-266)

- 1 What structures do the examples in (1) illustrate
- 2 What process does *VP-fronting* involve
- 3 What is *base position*
- 4 What is *landing site*
- 5 What augments an XP
- 6 What does *scope* mean
- 7 What sits in the specifier position of an NP [Spec, NP]
- 8 What does the structural parallel between NP and IP involve
- 9 Why cannot V-modifying adverbs function as VP specifiers
- 10 What speculation helps the identification of the VP-specifier as the subject
- 11 What does the *VP Internal Subject Hypothesis* involve
- 12 What is *agent*
- 13 What is *copy* in this context
- 14 What is a *derived position*
- 15 How is a copy represented
- 16 What is *multiple merge*
- 17 What is a *floating quantifier*
- 18 What is a *discontinuous constituent*
- 19 What does an *existential sentence* look like
- 20 Explain the difference between *thematic* and *grammatical subject*
- 21 Explain the following expressions: *dummy/expletive/provisional/grammatical subject*
- 22 Explain the following expressions: *notional/logical/thematic subject*
- 23 How does the *definiteness* of the (notional/logical) subject depend on the syntactic form
- 24 What does step-by-step NP movement involve
- 25 What empirical evidence is there for the step-by-step NP movement
