

Handout 2/c

- 1 What evidence is there for the NP specifier category
- 2 What and which words are the *determiners*
- 3 What is the difference between *determiner* and *specifier*
- 4 What is the grammatical 'content' of *specifier-head agreement*
- 5 On what basis does the author think that genitives are also NP specifiers
- 6 What properties is the specifier position associated with
- 7 What parallel(s) is/are there between NPs and sentences
- 8 In what way does (70a) show the parallel with NPs
- 9 What is the relation between *auxiliary* and *lexical verb*
- 10 How do we know that the NP immediately dominated by AuxP is specifier
- 11 Explain the relationship between *modifier*, *complement* and *adjunct*
- 12 What does (77a) show
- 13 What serves as VP specifier

TERMS

agreement, auxiliary, demonstrative, determiner, feature, genitive, modifier, locus, N, NP, N' (= N-bar/N-prime), number, *one*, plural, pre/postnominal, prenominal genitive, (maximal/intermediate) projection, quantifier, singular, specifier
